STRUCTURAL - Senior Project Manager – Anaheim, CA

STRUCTURAL integrates technology-driven solutions with specialty contracting services to improve, protect, and enhance the existing infrastructure of owners directly, and in partnership with designers and contractors. STRUCTURAL offers a wide range of specialty repair and maintenance services and is the largest concrete repair contractor in the United States, with roughly 2,500 employees working from locations nationwide and in select international markets. STRUCTURAL is the open-shop contracting division of Structural Technologies.

We are currently recruiting for a Senior Construction Project Manager to be based in our Los Angeles office which is located in Anaheim, CA. As a Senior Project Manager for STRUCTURAL, you will be responsible for managing complex construction projects that make our nation's structures stronger and last longer.

The successful candidate will be also be responsible for:

- Managing strengthening projects in the greater Los Angeles market
- Preparing contracts and negotiating revisions while working with internal contracts teams as needed
- Developing and managing schedules in collaboration with field leadership
- Maintaining profit & loss responsibility as well as other project financials including projections, etc
- Providing strong leadership, mentorship and supervision to other Project Managers, Field Managers, Project Engineers, and subcontractors
- Working closely with in-house Estimators and Sales teams to assist in reviewing bids and developing proposals
- Evaluating risk and loss exposure on projects managed
- Developing and maintaining strong customer relationships
- Demonstrating dedication to safety and quality control on all projects

Candidates who meet the following criteria may be considered for this exciting position:

- Bachelors degree in Construction Management, Civil / Structural Engineering or related field of study
- 10-17 years of relevant experience within the Commercial General Contracting market
- Demonstrated capability to successfully manage construction projects up to roughly \$5 Million - \$15 Million in contract value
- Previous experience managing projects that include structural strengthening and / or seismic retrofit work in the greater California area
- Proven knowledge of computer-based programs including Microsoft Office as well as project management and forecasting tools
- Strong leadership skills to effectively train and mentor others

Our ideal Senior Project Manager candidate is an innovative but decisive individual who can work effectively in a highly collaborative, team-based environment; has the ability to set goals and expectations and hold others accountable; can encourage and mentor others; is approachable, empathetic and outgoing; can quickly gain trust and respect; and is able to establish and maintain relationships.

STRUCTURAL is proud of a company culture that promotes 24/7 safety and quality. We offer competitive compensation and benefits including medical and dental insurance, 401(k), paid holidays, vacation, tuition reimbursement, career development and growth opportunities, and a caring work environment.

EOE/M/F/D/V
