

Our Requirements Are Good, So Why Aren't We Delivering Value

Betsy Stockdale, Seilevel

CCR: Technical

Our Agenda

TOPIC	YOU WILL LEARN
Measuring BA Success	Ways to evaluate the effectiveness of the BA
Quantifying Business Value	How to create measurable business objectives and use them on the project
Metrics that Matter	Which metrics executives care about that also reflect your success
Our Results at Measuring Success	Examples of measuring success that you can replicate
Now What?	4 things you can do tomorrow on your own project

Our Agenda

47%

of unsuccessful projects fail to meet their goals due to **poor requirements management**

Source: *PMI's Pulse of the Profession: Requirements Management — A Core Competency for Project and Program Success*, August 2014

Am I doing a good job?

How do I measure my BA team's performance?

Our CIO wants to cut the BA team back; how do I show our value?

Am I having any impact?

Developers don't think my requirements are very good; are they right?

Discussion

How do you measure the quality of the BA's work today?

How do know if the BA is doing a good job?

How do you know if the requirements are good?

Measuring Requirements Quality

Well written?

Complete?

Atomic?

Testable?

No ambiguous words?

Coherent?

Verified?

Pass the quality checker?

Glossary clear?

Unique identifiers

Consistent

..

We are emphasizing the wrong part of this phrase...

47% of unsuccessful projects fail to meet their goals due to poor requirements management

Source: PMI's Pulse of the Profession: Requirements Management — A Core Competency for Project and Program Success, August 2014

Requirements:
A means to an end

Example: Does the boat float?

Our Agenda

	TOPIC
✓	Measuring BA Success
	Quantifying Business Value
	Metrics that Matter
	Our Results at Measuring Success
	Now What?

Business Objectives Quantify the Value so we can Measure Whether we Deliver It

Business benefit that an organization expects to receive

Increase **revenue** or cut **costs**

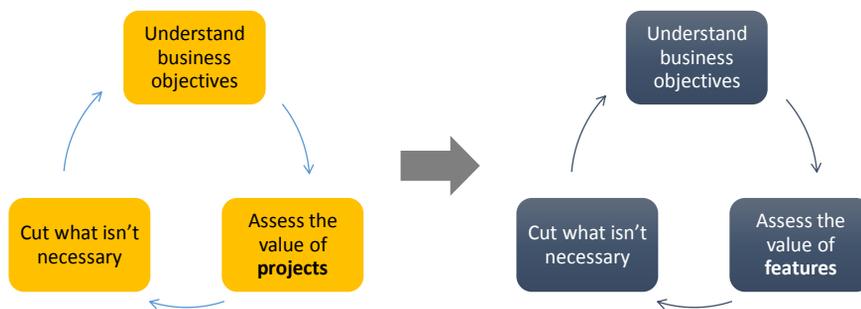

Example

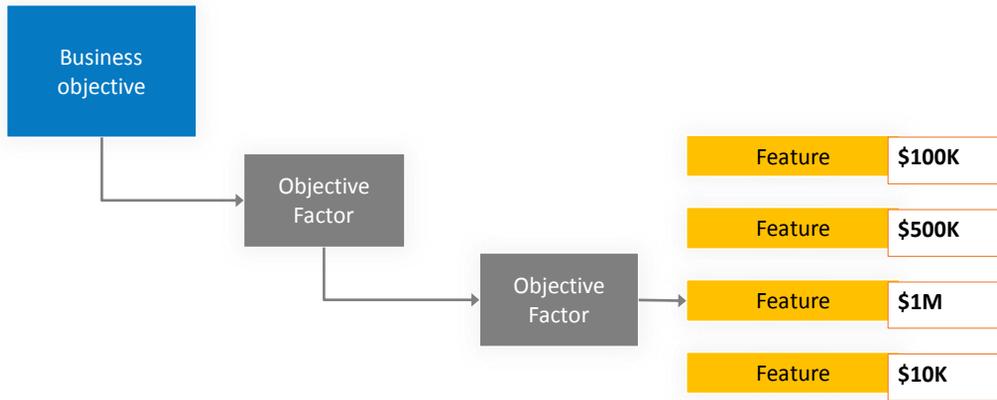

Reduce chemical purchasing expenses from 1M to 750K in the first year

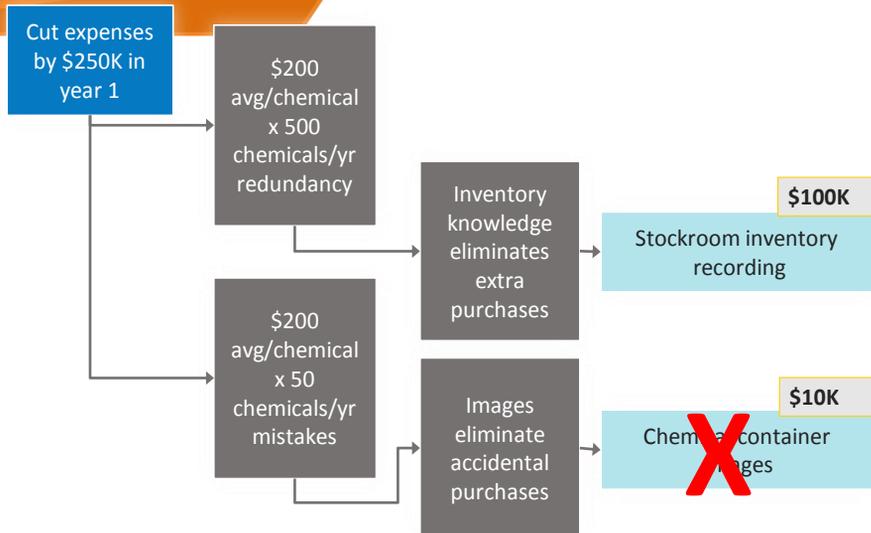

Prioritizing Projects and Features

Objective Chains: Quantify the Value

Example: Quantify the Value of Features

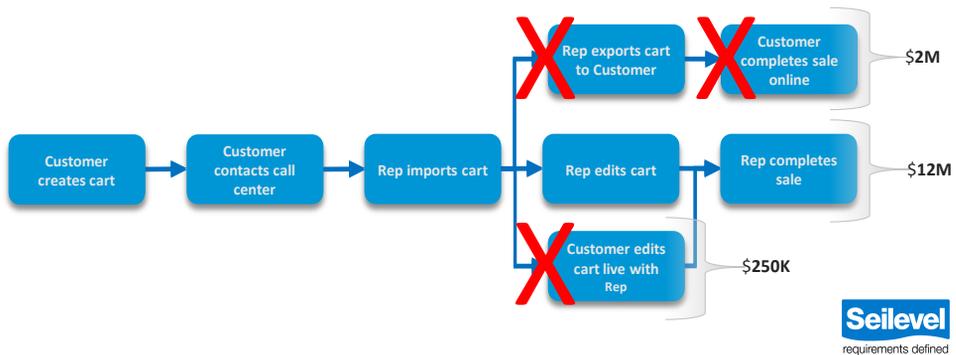

Case study: Scope cut 80% to meet deadline

Target ROI = \$14M

Original scope would cause missed deadline = \$0M

Results: scope cut to achieve \$12M ROI

Our Agenda

	TOPIC
✓	Measuring BA Success
✓	Quantifying Business Value
	Metrics that Matter
	Our Results at Measuring Success
	Now What?

Requirements Need Executive Support

50% more projects
meet goals when
executives value
requirements

66% of projects meet goals
when executive sponsors
value requirements

Only 44% meet goals when
they don't

PMI's Pulse of the Profession In-Depth Report: Requirements Management, A Core Competency for Project and Program Success (2014)

Metrics Related to Reducing Missed Requirements: Are these good enough?

Number of missed requirements

Number of requirements models used

Number of requirements mapped to models

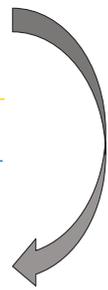

Number of requirements changes after developed

BUT, even CIOs Aren't Thinking About Requirements

- Top IT Issues**
- 1 Business/IT alignment
 - 2 Business agility
 - 3 Business productivity
 - 4 Cost reductions
 - 5 Time to market

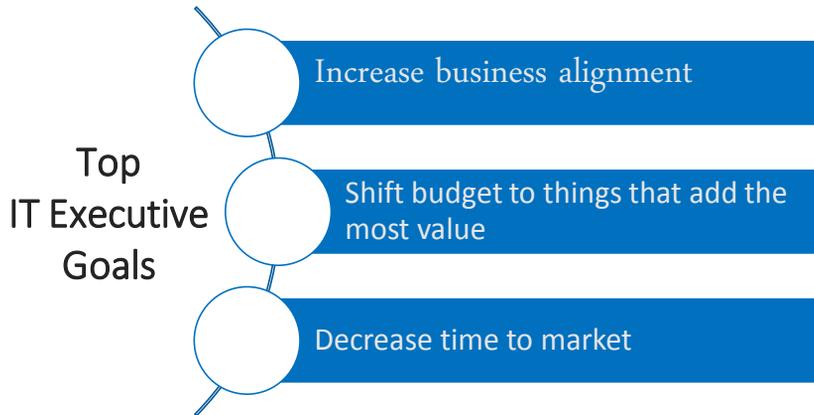

- Top IT Success Metrics**
- 1 On time
 - 2 On budget
 - 3 Customer satisfaction
 - 4 SLA targets
 - 5 Productivity
 - 6 ROI

Disconnect?

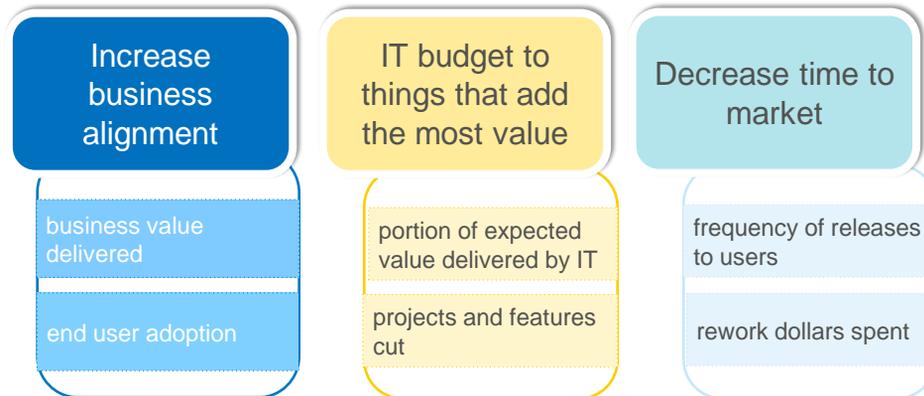

*2013 SIM IT Trends Study, Leon Kappelman, PhD, Primary Investigator

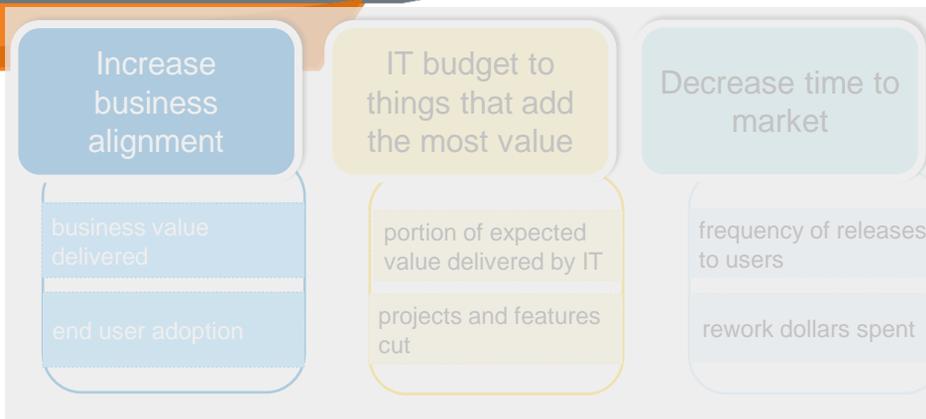

Based on: Borland's "When Agile and Waterfall Collide" seminar Jan 2013, Seilevel research and customer experiences

Metrics That Do Matter

Some Metrics are "EASY" to Start Measuring Today

- Business objectives exist
- Unnecessary features cut
- Business objectives measured after project launches
- % of projects that are late

Our Agenda

	TOPIC
✓	Measuring BA Success
✓	Quantifying Business Value
✓	Metrics that Matter
	Our Results at Measuring Success
	Now What?

PROJECT ANALYSIS: Examples of Use of Business Objectives

	Customer				
	1	2	3	4	5
Number of projects looked at	6	7	3	6	100+
Have business objectives	6	7	3	4	0
Measurable	4	5	3	4	0
Business objectives are related to money	2	5	1	1	0
Measured whether met business objectives	0	0	1	0	0

PROJECT ANALYSIS: Defining Success, then Using It Throughout

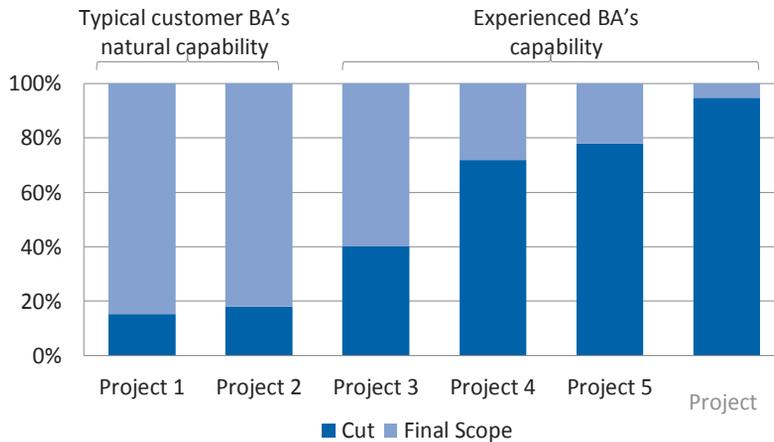

96% Projects have defined end-state success

67% Projects use success daily to drive activities *Out of 24 projects

Case Study: Percent of features cut

65% of features are RARELY or NEVER used

Our Agenda

	TOPIC
✓	Measuring BA Success
✓	Quantifying Business Value
✓	Metrics that Matter
✓	Our Results at Measuring Success
	Now What?

Business Analysis is Core to Deliver Business Value

Explore a range of ideas to ensure we don't miss opportunities for business value

Use **strategy** to screen out projects that don't support our goals

Define **business objectives** to link problems and features

Make feature choices using **objective chains**

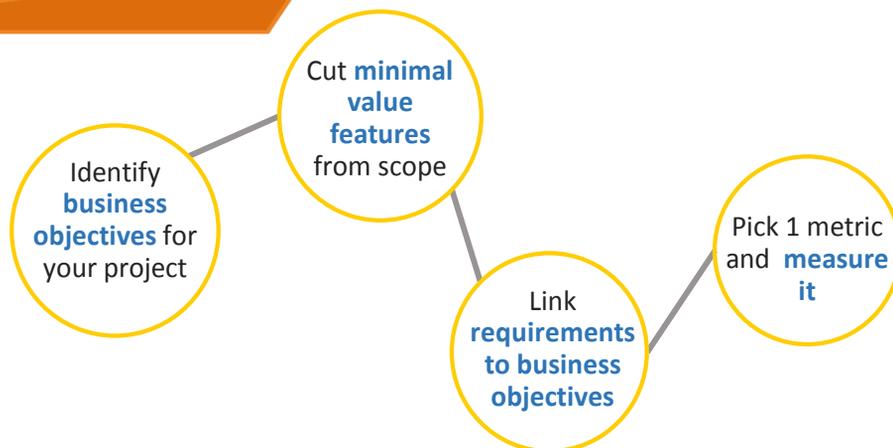

Be Ready for the Challenges

- 1 Can't measure business value until projects are over (and teams are gone)
- 2 Data doesn't exist today
- 3 People don't want to be held accountable for actual results

What Can You Do Tomorrow?

...so that YOUR projects deliver **business value!**

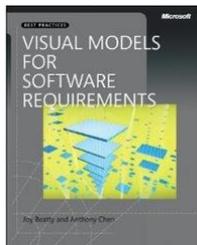

Key Takeaway: Requirements are a means to an end.

The requirements are perfect. But, does the boat float?
