# Phase Gates in Healthcare

September 28th, 2019

David Bobrow

# Agenda

- Welcome and Introductions
- CHOC Children's Overview
- Phase Gates at CHOC
  - Basics
  - In-Depth
- Phase Gate Process Demo
- Why are Phase Gates successful at CHOC?
- Questions

# CHOC Children's Overview

- Founded in 1964. Walt Disney and Walter Knott had a concept for a Children's Hospital in Orange County
- 2 Hospitals
  - CHOC Children's Hospital (Orange) - 312 Bed Facility
  - CHOC Children's at Mission Hospital – 50 Bed Facility
- Opened Bill Holmes Tower in 2013 that contains Surgery, Radiology, Laboratory, and ER Departments.

# CHOC Children's Overview

- Numerous Outpatient Primary and Specialty Clinics
- CHOC Children's is affiliated with UCI Medical School as well as SOCPA, SeaView, Los Alamitos Pediatric Medical Group, Pediatric and Adult Medicine Inc., Pomona Valley Hospital, and PIH in Whittier.
- Number of visits in 2018
  - Inpatient = 12293
  - Outpatient = 237,734
  - ED = 89013

# CHOC Information Services Growth

- 12 employees in 2001
- 50+ employees in 2007
- 110+ employees in 2019
- **286 Applications Supported**
  
- CHOC PMO Evolution
  - 2 PMs in 2007
  - 8 PMs in 2019
- **All CHOC PMs have PMPs**

# Phase Gates at CHOC

# Phase Gates at CHOC - Basics

- What is the definition of Phase Gates in Healthcare Projects?
  - This is to verify that the project is going through each of the phases of the project lifecycle.
- Why does this process occur?
  - CHOC PMs are responsible for providing the required project documentation
  - CHOC ISD (Information Services Department) management has basic knowledge of every project going on in the PMO portfolio.
  - Ensure project resource availability

# Phase Gates at CHOC - Basics

- Established formal process in June 2018
- The PMO manager leads the Phase Gate meeting
- CHOC ISD Leadership meets once a week for a ½ hour.
- Project Manager has to submit required documentation 1 week in advance.
- The participants are as follows:
  - Chief Technical Officer
  - Associate Chief Technical Officer
  - Chief Information Security Officer
  - Clinical Informatics Exec. Director and Supervisor
  - Revenue Cycle Supervisor
  - Business Intelligence Director and Manager
  - Operations Support Supervisor
  - Technical Services Managers
  - ISD Customer Service Director

# Phase Gates at CHOC – In Depth

- Phase Gate consists of 6 phases:
  - Phase 1 – Planning
  - Phase 2 – Design
  - Phase 3 – Build/Unit Testing
  - Phase 4 – Integrated Testing
  - Phase 5 – Deployment Go-Live
  - Phase 6 – Project Closure

# Phase I – Requirements for Planning Phase

Control Activity	Control Description
Conceptual Technical Design Agreement	Sign off by ARC team
Budget Estimate (High Level)	Non Due Diligence Budget Estimate
Resource Assigned	Slotted through Intake process
Signed Legal Contract	Signed contract with BAA
Signed Charter	Charter with Scope of Work
Project Plan (Preliminary)	Develop Preliminary Project Plan and Publish to Clarizen
Stakeholder Analysis	Individuals who are invested in the project
Kick Off	Hold Kickoff Meeting
Governance/Project Meetings	Scheduled Governance Meetings
Project Team Meetings	Scheduled Project Team Meetings
Project Resources Available	<input type="checkbox"/> Yes <input type="checkbox"/> No

## CHOC PMO PROJECT CHARTER

**Project Name:** Cerner GI Imaging

<p><b>Project Leader:</b> David Bobrow</p>	<p><b>Budget/Timeline:</b>  <u>Budget</u>  <ul style="list-style-type: none"> <li>\$43,178 provisioned</li> <li>TBD estimated to complete</li> </ul> <u>Timeline</u>  <ul style="list-style-type: none"> <li>Initiated: 12/18/2016</li> <li>Kick-off: 12/11/2018</li> <li>Go-live: mid-late 3/2019</li> <li>Close: mid-late 4/2019</li> </ul> </p>

**CHOC Children's**  
**Procedure Imaging and Documentation**  
**Go/ No-Go Checkpoint**  
**Criteria and Guidelines**  
**04/03/2019**

The following list contains the criteria that should be used to evaluate the preparedness for implementation into the Live environment, and to complete the Go/ No Go Checkpoint. By design, this checkpoint occurs at the conclusion of Live Planning, but before all activities required for Live are complete. Therefore, this checkpoint is not a substitute for user acceptance or overall preparedness for Live. Inability to satisfy one criteria or guideline is not meant to stop the project, nor does meeting all criteria and guidelines assure success.

These guidelines are established to:

- Help the Project Team (consisting of IS and Surgery) make an informed judgment about whether or not to move forward with activation processes (including Live Plan communication)
- Review status of major tasks remaining before Live
- Understand and put into perspective key risk factors on the project
- Provide ample information to guide the steering committee to an educated decision

Area	Criteria	Documentation	Guidelines	Recommendation
Testing Events/ Data Validation	Data has been validated and passes all testing.	<ul style="list-style-type: none"> <li>• Functional Evaluation – fully validated &amp; signed off based on the Patient Testing Script.</li> <li>• In the test plan, 4 patients were tested involving various procedures based on the following process:                             <ul style="list-style-type: none"> <li>• Schedule/Check In</li> <li>• MDR – Hyland</li> <li>• Device Testing</li> <li>• Cerner Workflow</li> <li>• Image Management</li> <li>• Cerner Note Creation</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Testing events have been executed.</li> <li>• Physician review has been completed.</li> <li>• SMEs review has been completed.</li> </ul>	<ul style="list-style-type: none"> <li>• Go, providing the following gets is done by Go-Live:                             <ul style="list-style-type: none"> <li>• Validation that all procedure descriptions get tested via the Cerner-Hyland MDR scheduling interface.</li> <li>• A diagram of the GI tract needs to be in place for GI.</li> <li>• Add GI Quick Orders</li> <li>• Add Procedure Date for Printed Images</li> <li>• Validation of all 4 MDR devices</li> <li>• Validate that each room that the cart is used at has a network jack.</li> </ul> </li> </ul>

E19 None

 <b>CommonWell Lessons Learned</b>				
Date	Application	Lesson Learned	Process Impact	Business Impact
<b>Planning</b>				
9/19	Application	Brought HIM perspective into this project from the beginning. This made the project go much smoother.	None	None
9/19	Application	Have the 2 phase approach (Phase 1 - Physician Informaticists, Phase 2 - House Wide Deployment) made the overall deployment much easier.	None	None
<b>Design</b>				
9/19	Application	Creation of the CHOC Application and Technical Design Development Matrix (DDM) went smoothly. This is due to great team collaboration.	None	None
9/19	Application	Cerner was able to answer questions right away. Very good communication involving both CHOC and Cerner	None	None
9/19	Application	DDM application and technical documentation was very thorough, which contributed to successful Go-Live.	None	None
9/19	Application	The design was very straight forward which made it for a smooth implementation.	None	None
<b>Build</b>				
9/19	Application	The Cerner technical resource got everything he needed in a short period. This is due to great team collaboration.	None	None
9/19	Application	The CHOC team spent a good amount of time in this area which contributed to the team's success.	None	None
<b>Testing/Training</b>				
9/19	Application	The Cerner and CHOC test plans was very thorough Also, Cerner testing helped tremendously, which make it for a very smooth Go-Live Deployment for both phases 1 and 2.	None	None
9/19	Application	The CHOC team tested CommonWell very thoroughly which contributed to a successful Go-Live.	None	None
9/19	Application	Testing went very smooth, which reflected on a very smooth Go-Live. There were no too many Cerner SRs.	None	None
9/19	Application	The Cerner and CHOC PMs listed issues in an easy to read format (Excel spreadsheet), which helped a lot in issue resolution.	None	None
9/19	Application	The training documentation helped tremendously, thus having very few calls during the Go-Live.	None	None
<b>Deployment</b>				
9/19	Application	The Cutover plan helped tremendously in Deployment since it was very clear. It was a good model for Deployment.	None	None
9/19	Application	It was also a good idea to do the Physician Informaticist pilot first so that we catch any major issues before house-wide deployment.	None	None
<b>Post Go-Live Support</b>				
9/19	Application	There was a major issue concerning Workflow which was responded to pretty fast. This is due to good collaboration of the Cerner and CHOC project teams.	None	None

A close-up profile of a young child with blonde hair looking out a window. The window has raindrops on it, and the background is a blurred outdoor scene. The text "Phase Gate Process Demo" is overlaid in white.

A young child with blonde hair is sitting in a green plastic boat on a grassy lawn. The child is holding two wooden oars, one in each hand, and looking towards the right. The background is a lush green lawn with trees in the distance. The text "Why is Phase Gate Successful?" is overlaid in white on the image.

# Why is Phase Gate Successful?

# Why is Phase Gate Successful at CHOC?

- ISD Leadership project awareness
- A greater number of projects are done on time
- Project Documentation is done in a more timely manner
- ISD Leadership has knowledge of resources.
- To date 100+ Phase Gates have been done.

# Questions

A child wearing a white, fuzzy bear costume is walking away from the camera down a dirt path in a forest. The path is covered with fallen leaves, and the surrounding trees are dense and green. The lighting is soft and natural, suggesting a late afternoon or early morning setting.

**Thank You**
