Kurt Rebiger

Regional Project Leader @ Stiles Machinery | Project Management, Cross-Functional Team Leadership
Covina, California, United States

Summary

Driven Leader with a strong technical background leading cross-functional teams and managing industrial automation projects. Currently, I oversee all new machine installs for the region and personally manage 10-15+ concurrent projects (typically \$500K-\$3MM in scope) at Stiles Machinery. In all aspects I emphasize collaboration, integrity, and authentic communication.

Experience

Stiles Machinery

6 years 8 months

Regional Project Leader

February 2023 - Present (2 years 10 months)

Rancho Cucamonga, California, United States

- Established a new role, expanding regional capabilities for large-scale projects previously managed nationally.
- Oversee one direct report, all new machine installs for the region and personally manage 10-15+ projects (\$500K-\$3MM) concurrently, optimizing logistics, resource allocation, and execution.
- Lead project kickoff, pre-installation, and stakeholder meetings, ensuring alignment and project success.
- Manage cross-functional teams, including third-party vendors, factory partners, engineering, product management, technicians, support staff, and product enhancement teams, to drive projects from sale to successful completion.
- Implement process enhancements, reducing downtime and improving operational efficiency across projects.

Field Service Representative

April 2019 - February 2023 (3 years 11 months)

California, United States

- Installed, repaired, relocated, and maintained industrial machinery, ensuring peak performance and minimal downtime.

- Interpreted electrical schematics, troubleshooting electrical 24VDC, 208-480 VAC, pneumatics, mechanical components, programming, and calibration.
- Provided customer training, equipping clients with operational and maintenance best practices.

Beyond Organic

Project Manager

November 2017 - August 2018 (10 months)

Greater Boston Area

- Developed company infrastructure, creating policies, financial frameworks, and securing funding for growth.
- Built market presence, fostering relationships with vendors, customers, and leadership to drive adoption and scalability.

United States Marine Corps

Radar Technician

January 2013 - December 2017 (5 years)

Camp Pendleton, CA.

- Managed \$10M in Air Traffic Control assets, leading a team of 15 Marines in training, mentorship, and operational readiness.
- Interpreted technical schematics, troubleshooting radar and avionics systems to maintain peak mission performance.
